

WE'RE COMMITTED  
TO SUPPORTING  
HEALTHY FUTURES  
FOR NEW ZEALAND  
LIVESTOCK.

VETMED

---

We founded the company Vetmed and the Vetmed range of products in 2011, out of a shared passion for helping New Zealand farms to thrive. With more than 60 years' experience in the animal health business between us, we saw an opportunity for a local manufacturer that intimately understood the needs of Kiwi farms and livestock.

We are keen to be a company, with its roots firmly planted in New Zealand soil, that is here to stay. And, we want to be involved in making

groundbreaking products, from conception to completion, for decades to come.

Farmers typically are shearing the sheep, milking the cows and driving the tractor on their farms. We're the same – we're an independent animal health manufacturer with steel in the ground and we devote our expertise and energy to every product we make. We're building an iconic New Zealand brand while developing products specifically suited to Kiwi farms.

# ANIMAL HEALTH MADE EASIER

---

Farmers wake up every morning to different challenges. Our intention is to take some of those worries away by making animal health less stressful. We're committed to researching,

developing and manufacturing innovative animal health products to create healthy futures for New Zealand livestock.

Our comprehensive product range benefits from our extensive knowledge and understanding of the local agricultural environment. [Every aspect of Vetmed's manufacturing process is done in our North Island laboratory, and each product is trialled and tested on local farms under the supervision of leading experts.](#)

Our treatments for sheep, cattle and deer are developed to be more advanced than other generic solutions and pass rigorous testing. Put simply, they perform better because of that. At Vetmed, we can prioritise and respond quickly to new market requirements for New Zealand farmers.

# UNDER ONE ROOF

We work in our own, state of the art facilities in the North Island, New Zealand. It was built, literally, from the ground up by the three of us.

Since then, our growth has been rapid but everything we do still takes place in our laboratories, our factory and our manufacturing rooms. Thanks to our brick and mortar location, our team create

and move large volumes of proven products which are growing by the year.

Our cutting edge work spaces can expand and contract according to how many animal health products we are working on at one time, which means we can ramp up production whenever it's required to meet the needs of New Zealand farms.

# OUR PRODUCTS ARE FORMULATED SPECIFICALLY FOR NEW ZEALAND FARMS.

We create products and solutions that revolutionise livestock drenching.

[Vetmed's range of products are pioneering in the animal health industry because each treatment is formulated to kill parasites specific to New Zealand.](#)

When working on improving a generic product, we experiment with new processes and compounds alongside other ingredients that weren't available until recently, to ensure our products are more advanced and effective.

Our research and development doesn't stop. We are continuously developing new and current products whilst obtaining approvals for treatments that will revolutionise drenching. We're excited to introduce some of these ground breaking products in the very near future as we evolve them.

Currently we have an extensive Vetmed family of products designed to work effectively across New Zealand farms. To view the range in more detail visit our website [vetmed.co.nz](http://vetmed.co.nz)

## POUR-ON

### VETMED EPIMAX POUR ON

FOR THE TREATMENT AND CONTROL OF INTERNAL AND EXTERNAL PARASITES IN CATTLE AND INTERNAL PARASITES OF DEER.

Dose Rate: 1mL/10kg  
WHP: Milk Nil, Meat Nil  
Deer: Meat 7 Days  
Available in 20L, 5L, 2.5L and 1L packs

+1 EPRINOMECTIN

### VETMED MOXIDECTIN POUR ON

FOR THE TREATMENT AND CONTROL OF PARASITES OF CATTLE AND OF LUNGWORM AND ROUNDWORMS OF DEER.

Dose Rate: 1mL/10kg  
WHP: Milk Nil, Meat Nil  
Deer: Meat Nil  
Available in 5L and 1L packs

+1 MOXIDECTIN

### VETMED DORAMECTIN POUR ON

FOR THE TREATMENT AND EXTENDED CONTROL OF DORAMECTIN SENSITIVE INTERNAL PARASITES OF CATTLE.

Dose Rate: 1mL/10kg  
WHP: Milk Nil, Meat 35 Days  
Available in 20L, 5L and 1L packs

+1 DORAMECTIN

### VETMED ABAMECTIN POUR ON

FOR THE TREATMENT AND CONTROL OF INTERNAL AND EXTERNAL PARASITES OF CATTLE.

Dose Rate: 1mL/20kg  
WHP: Milk Nil, Meat 35 Days  
Available in 20L, 5L, 2.5L and 1L packs

+1 ABAMECTIN

### VETMED LEVAMISOLE POUR ON

FOR THE TREATMENT AND CONTROL OF GASTROINTESTINAL ROUNDWORMS AND LUNGWORM IN CATTLE.

Dose Rate: 1mL/20kg  
WHP: Milk 24 hours, Meat 10 days  
Available in 5L, 2.5L and 1L packs
